

It's time to get round to using

Polysulphate
Premium

It's time to get round to using Polysulphate Premium

- ⊕ Uniform, robust spheres of natural, multi-nutrient fertilizer
- ⊕ Smooth surface protects from abrasion, humidity or damage
- ⊕ Spherical shape gives consistent flow rate
- ⊕ Consistent broad spread during application
- ⊕ Easily blended with other fertilizer materials
- ⊕ Attractive appearance in blends with other granulated fertilizer ingredients

Introducing Polysulphate Premium®

Polysulphate Premium is a new 4-in-1 fertilizer for improved crop yields. Polysulphate Premium contains four plant nutrients: sulphur, potassium, magnesium and calcium.

Although Polysulphate was first found almost 200 years ago in Europe, only recently has a large-scale deposit been discovered and now mined by Cleveland Potash – 1,200 m underneath England's North Sea.

Now this 4-in-1 fertilizer is available to farmers. Polysulphate Premium brings the advantages of robust, spherical, broad-spreading, easily-blended and natural fertilizer to fields all over the world.

What's in Polysulphate Premium?

Polysulphate Premium is derived from polyhalite, a naturally-occurring mineral, which contains elements essential to high-performance plant growth and function: $\text{K}_2\text{Ca}_2\text{Mg}(\text{SO}_4)_4 \cdot 2\text{H}_2\text{O}$

S

45.6% SO_3 (18.2% S)
balances crop's need for S and improves efficacy of other nutrients (e.g. N and P)

K

13% K_2O (10.7% K)
as potassium sulphate, vital for improved crop health

Mg

5.6% MgO (3.4% Mg)
as magnesium sulphate, essential for photosynthesis

Ca

16.4% CaO (11.8% Ca)
as calcium sulphate, crucial for cell division and strong cell walls

Advantages of Polysulphate Premium

For direct application
and bulk blending

Ideal for all crops
and soil types

Fully soluble, with all
nutrients available for
plant uptake

Low carbon footprint
fertilizer, helps
growers achieve
carbon targets

The low chloride
content makes it ideal
for chloride-sensitive
crops

Increases yields and
improves crop health
and vigour

“Polysulphate Premium gives me the all-round performance I need to get my crops off to a good start and it keeps them precisely nourished through to harvest”

Mined in the UK, ICL is the first – and only – producer in the world to mine polyhalite, marketed as Polysulphate.
